Quote by Mr. Anders Magnusson, CEO AGES Industri AB:

"Within AGES, we act to be at the forefront of processes and technology development. Within the Aluminum casting business area, we see a potential for new products and solutions with the Reho Casting process. Through our investment and cooperation with Comptech, we are building a platform for the next generation of aluminum parts."

Quote by Per Jansson, CEO and owner of Comptech AB:

"The agreement with AGES is the shape of integrated and openminded cooperation as we at Comptech needs strong partners for further development and in AGES we see a great potential to increase the engineering capacity needed for the eMobility transformation that is taking place right now."

About AGES Industri AB

AGES is a major component producer located in Sweden and China with 7 sites in total. The main market offer is components based on casting, machining and welding. The aluminum production are based at our sites in Unnaryd and Kulltorp, Sweden.

About Comptech AB

Comptech AB is an innovative foundry group with production in Sweden and in China. In total 200 people work at Comptech, most of them at the volume facility in Suzhou. R&D center is based in Skillingaryd, Sweden. Almost all R&D efforts has been focused on Rheocasting and among recent results leak free components and components with high thermal conductivity (180 W/mK) and high strength has now entered the market.
